Free-Standing **Twin** - Ramp High

...an ideal solution

The problem of car manufacturers designing vehicles with 'built-in' tailpipes is now becoming increasingly common. Trying to find the right fume extraction nozzle is now virtually impossible, not to say, very expensive. A new approach is required. **FUMEX** introduce the new and innovative Free-Standing **Twin** - Ramp High.

Following the successful launch of our earlier model, our latest Ramp High model can now cover the complete height range of workshop lift/ramps.

Developed to be totally universal and adaptable, in both nozzle height and nozzle width, to conform to a wide range of twin exhaust vehicles.

Sturdily manufactured in steel, it's lockable wheeled base makes it easy to manoeuvre and simple to adjust to working height and width. Connect your existing extraction nozzle/hose to the 'Y' piece included and it's ready for operation.

- Covers full lift/ramp height
- Easy to manoeuvre
- High quality build
- Both nozzles fully height & width adjustable
- High temperature hosing & 'Y' piece included
- Suitable for a wide range of different hose diameters.
- Minimum Nozzle height: 130mm *
- Maximum Nozzle height: 1870mm *
- Minimum Nozzle width: 360mm *
- Maximum Nozzle width: 1400mm *
- Rubber nozzles: 245mm x 85mm

(* sizes given are to centre of nozzles)
