## Free-Standing Tray

*...an ideal solution for the new Scania ADL E400S*

**FUMEX** have developed a Free Standing Tray to overcome the unique shape of the exhaust on the new Scania ADL E400S. This now ensures that the harmful diesel emissions are safely captured at source and prevents operatives breathing them in.

Our 310mm wide Free Standing Tray is manufactured in galvanised steel, for both stability and durability.

May be used for 'diesel regeneration' when used with high temperature hosing.

The Free Standing Tray is easy to move and store after use and with it's ultra-low profile, may be used on other vehicles where clearance is an issue.

Over our 37 year history, FUMEX Ltd has introduced many cost effective, innovative products and solutions to the automotive industry.

For further details, or to arrange a demonstration please contact us.

- Fully height adjustable
- Min. tray height: 95mm  
Max. tray height: 550mm
- Easy to manoeuvre
- High quality build
- Ideal for regeneration with high temp hose
- Suitable for a wide range of different hose diameters.
