Leading The Way To a Healthy Workspace

Wood Dust Extraction Systems

With our wide range of Wood Dust Extraction Systems, together with our dedicated LEV testing engineers, FUMEX has a cost effective solution to all of your extraction requirements.

With today's strict Health & Safety regulations, protecting your employees from airborne dust particles has to be a number one priority. Machining any type of wood can cause hazardous levels of dust to enter the atmosphere, though one, MDF is thought by many to be very dangerous due to the fineness of the dust particles. FUMEX can design, install and commission a complete range of Wood Dust Extraction Systems, from a single machine to a full workshop, FUMEX have the answer. Every system is individually designed to meet with your exact requirements and are fully COSHH tested on completion to ensure compliance to all current regulations and are fully ATEX approved. FUMEX also supply replacement bags and filters for a wide range of systems.
