

Articulated Boom Arms for Military Vehicles

...an ideal solution

Articulated Boom Arms for Military Vehicles

...an ideal solution

Having an efficient exhaust extraction system is important for anyone working with all types of engine. This is particularly so when dealing with large military diesel engines.

Capturing the large volume of exhaust fumes generated by a 26.6 litre MBT diesel engine with twin ports, together with an ancillary engine port, requires a substantial and efficient system.

With almost 40 years experience in the field of exhaust fume extraction, Fumex Ltd have the depth of knowledge to provide such a system.

Our wide range of articulated boom arms are designed to support the large diameter hose/ducting required for military vehicles.

Manufactured from high quality steel profiles, they include smooth ball-bearing pivots and a disc brake to ensure easy positioning.

We have a full range of exhaust fume hoods, all custom designed to your exact requirements, completing our cost effective fume extraction systems on offer to the Defence industry.

Please call or email for further details.
