Complete Welding & Grinding Booth

MF-Grinder

MF-Grinder

The MF-Grinder is a complete welding and grinding booth that is easy to use and clean. Simply plug-in, switch on and you're ready to weld or grind. With a large 900mm x 600mm x 6mm heavy duty steel table, our MF-Grinder is designed for many welding, grinding and fettling applications.

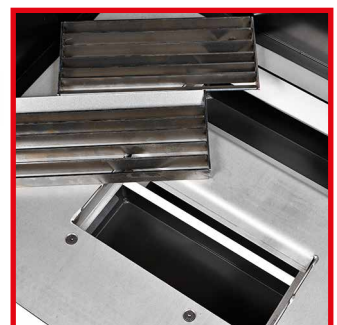

Fitted as standard with twin water spark traps to capture sparks and larger particulates, a powerful 1.1kW motor enables the twin grids to exhaust over 2000m³/h, ensuring that toxic weld fumes and grinding particles are safely drawn down through a large cartridge filter. The filtered air is then returned into the workplace to reduce heat loss.

The Jet-pulse filter cleaning system is designed to quickly and efficiently clean the internal cartridge filter (when connected to compressed air supply) via the hose supplied. Fumex Ltd recommend emptying the dustbin before and after the cleaning process to maximise the cleaning efficiency.

Our unit is equipped with many features, such as a built-in welding gun holder, a connection for the earth cable from the welding machine, overhead light, removable grids for easy cleaning and lockable front castors.

- Over 2000m³/h
- Overhead light
- Removable Grids
- Powerful 1.1kW motor

- Jet-Pulse Cleaning System
- Easy to operate & Clean
- Twin Water Spark Traps
- Large Working Area
