Mobile Weld Fume Filtration Unit (H13/W3)

The new 2020 MF HEPA is a mobile weld fume extractor with 2-stage filtration and incorporates a spark deflection plate to protect the filters. The primary cartridge filter has up to 99% efficiency and the main HEPA filter has over 99.95% (H13/W3) efficiency. Both filters are easily replaced when required, ensuring that the MF HEPA is always ready to be used. The powerful 1.1kW motor extracts over 1000m³/h through the hood to provide a safe level of filtration, even when welding stainless steel.

Supplied with a super flexible 3m (160mm dia.) Flexi Extractor Arm, primary cartridge filter, main HEPA filter and hood, just plug-in, switch on and you're ready to weld. Available in 110V & 240V and now with optional flow meter.

The MF HEPA is a cost effective solution to all of your welding fume requirements.

- Simple to operate
- Supremely versatile
- 3m Flexi-Arm
- Over 1000m³/h
- Easy to maintain
- HEPA H13/W3
- Spark deflection Plate
- Optional Flow Meter
