Leading The Way To a Healthy Workspace

Breathing Air Quality Testing

Employers have a legal obligation to ensure the quality of breathable air fed to an operator (eg. via a mask) is to a suitable standard. **FUMEX** offer a comprehensive testing service throughout the UK to a wide range of Industries by our fully trained to P601 standard engineers.

We specialise in on-site testing of breathing air quality, to ensure that it complies to all current regulations.

Our highly sensitive test equipment samples the supplied air, testing for levels of Oxygen, Carbon Monoxide, Carbon Dioxide, Oil Mist, Water Vapour as well as temperature and system pressure.

COSHH Regulations require testing of breathable air to be carried out periodically and that records are to be retained for a minimum of 5 years.

- Breathing Air Quality Testing
- Air Quality Monitoring (Associate Company)
- Substance Detection & Monitoring
- Statutory Inspection Services
- COSHH Testing
- All Engineers trained to P601 (BOHS) Standard
- Design Engineers trained to P602 (BOHS)
- Online Certification Management
- Established in 1980

P601 Certification
