

FUMEX **FUMEX** LTD

COSHH Testing

Leading The Way To a Healthy Workspace

COSHH Testing

Many companies are still unaware of the need to comply to current COSHH (Control of Substances Harmful to Health) regulations. They may feel that they simply do not need to, or have the time to implement such a system. **FUMEX** specialise in the testing and certifying of all types of LEV by engineers trained to P601.

We test and service all plant, equipment and exhaust extraction systems that improve air quality or extract hazardous materials from the working environment along with breathing air quality testing.

Our service, one of the best in the UK because of our Unique Software System, covers engineering workshops, medical equipment manufacturers, motor manufacturers, goods vehicle testing, garage workshops, schools, colleges, universities and a whole host of other industries.

- LEV - Local Exhaust Extraction
- Exhaust Extraction System Servicing & Testing
- Weld Fume
- Chemical Fumes
- Gas Fumes
- Smoke Clearance Testing
- Breathing Air Quality
- Air Quality Monitoring
- Substance Detection & Monitoring
- Statutory Inspection Services

Our software system provides an unrivalled testing and recording service, at the most economic pricing in the UK.

A full and detailed record is entered and maintained, ensuring the data contains all the available information stipulated by COSHH regulation 9. This information can then be accessed immediately should a review be required.

Whether it is a simple COSHH test or a complete health monitoring service, our team of assessors will be able to help or advise.
